How to publish your Embark results?

We would like you to make the results of your Embark available to the public. But, it's not required. However, if you don't want to make the results public, please do share them for research purpose. In that case the results will be used for the population analysis, but will stay anonymous. At the bottom of this document you will find a way to do that.

How to publish your Embark results on Facebook?

How to keep your results private but still provide them for research purposes?

1. Send a PDF of the full report to Kate Hogan (by Facebook Messenger or email) and it can be added in to the analysis results.

completed	OFA DNA application form. At the top of the application, please be
sure to writ	te which tests you want to register with the OFA.

Click on the blue text FULL REPORT and then click in the upper right corner on download/print. This will give you the option to print or save a pdf that you can store on your device. Then send a copy of the PDF to Kate Hogan by PM or email at BelgianShepherdHealthProject@gmail.com .

2. Another way to share your results for analysis is to add Kate Hogan as a "Shared Owner". Anyone that is a "Shared Owner" can access that dog's results at any time to get the latest results.

You can add a shared owner just above the privacy settings:
